

PLUMAS EUREKA COMMUNITY SERVICES DISTRICT
REGULAR BOARD MEETING August 10, 2022

Agenda Item #4 Farr West Engineering Task Order #19

Background: Farr West Engineering as the District's Engineer, works according to task orders. This is the Task Order used for billing miscellaneous work requested by the Board or General Manager. The types of work usually performed are tasks that are limited in scope such as responding to specific engineering related questions such as explaining the scope of a problem and optional solutions to engineering issues related the water or wastewater systems. Without this authorization, all engineering work not related to an existing task order, no matter how limited in scope will have to be approved by the Board limiting the ability of the General Manager to make timely decisions.

Recommendation: Approve Task Order 19.
