Report on Arsenic Compliance Actions

October 11, 2017

Submitted by John Rowden, Interim General Manager

Arsenic Compliance Level.

The last reported sample at the compliance point was on September 7, 2017 and showed that the arsenic level at the compliance point was 13 ppb. The EPA standard is 10 ppb.

Samples taken on August 3, 2017 showed the level at Well 1B at 8 ppb and the level at Well 2 at 16 ppb.

Remediation Project Development

State Revolving Fund Loan. The State Revolving Fund Planning Loan for $350,000 has been approved and is now available to the District. The District will be requesting funds to pay for the costs associated with the feasibility study, the pilot study, and environmental reviews. The term of the loan is five years, but can be rolled into a longer term construction loan from the SRF.

Facility Location. The Board selected 208 Lundy Lane for the location of the Water Treatment Plant. Farr West Engineering surveyed the property and showed that the facility could be built on the sites. The Board finalized the selection.

Design Engineering. Farr West was issued a Task Order as the District Engineer, to design the facility. The Task Order has a not to exceed amount of $275,000. The Interim General Manager and the Farr West project manager will be meeting with Plumas County officials to determine the specific County requirements for the project these include encroachment permits and setback requirements.
