Hello, we have a house on Sugar Pine Drive. We recently (1 week ago) remodeled 2 bathrooms and installed all new fixtures and sinks, toilets etc. Both new sinks and toilets have stained with a weird almost rough brown build up where the water comes out of the faucet. Ruined new fixtures in one week of use. Cost \$1900!! We have a paper element filter coming into the house, but obviously the water quality being supplied is terrible. We voted to approve the treatment plant to remove manganese and iron, but unfortunately short sighted occasional home owners voted this down. Sadly. The word is out that the water in Plumas Pines is bad, and we now witnessed just how bad it is.

Todd and Kathleen Solomon
203 and 205 Sugar Pine Drive.

Good morning Todd and Kathleen,

Thank you for your observations. As you may know the Board of Directors will be considering moving forward with building a Water Treatment Plant at the upcoming Board meeting. We will include your email as information during the discussion of the issue. If possible, please participate in the Zoom meeting on Wednesday, January 13 at 9 am. The link to the meeting will be on the Agenda that will be posted Saturday on the District website. If you have further comments or questions, please contact me.

John
